WORK EXPERIENCE

PHP Programmer   July 2021 - Present
PT. Boston Makmur Gemilang

As a PHP programmer, I build website applications using the Code Igniter and Laravel framework
At Boston Makmur Gemilang, I handled 2 project systems. in here I was asked to design, develop and implement projects according to client requests.
Participating in the analysis process and collaborating with the team are activities that I often do at this company.

Web Developer & IT Support (Intern)   Oct 2019 - Dec 2020
PT. Multi Fabrindo Gemilang

In this company I was asked to build an application that would be used by company users.
Apart from being a Developer, I was also asked to become an IT Support who helps users solve problems faced by users, such as network problems, devices, applications, etc.

Fiber Optic Technician (Intern)   Oct - Dec 2016
PT. Telkom Access

A school program that requires students to try out the world of work.
Here I work as a fiber optic network technician, tasked with migrating telephone networks to fiber optic

APPS EXPERIENCE

- **Kasumi Workflow System**

  It is a web application designed to meet the needs of clients' offices.
  There are several modules, such as petty payments, recruitment, master data, and target management.
  Develop Features according to client and user requests
  Technologies used: Laravel, MySql, GIT.

- **My Green Growers Website**

  Website to promote GreenGrowers products.
  In this project I worked on a CMS Dashboard to manage website content.
  And also provides APIs for various website activities such as Get data for content, Post Messages, Email Notifications.
